

## Licensed Clinical Therapist

*Interested applicants should email a copy of their CV or resume to [info@growthps.com](mailto:info@growthps.com)*

Growth Psychological Services, PLLC (GPS) is a well-respected, growing private practice providing therapy and neuropsychological testing services in Libertyville, IL.

Demand for therapy services in our area is far outpacing our ability to meet individual and family needs. We don't want to quote a wait time for therapy services that would best serve our clients now. We are looking to thoughtfully grow our team with the right clinician. We are currently seeking a licensed clinical therapist (LPC, LCPC, LCSW, LMFT, or LCP) with in person and hybrid opportunities available. GPS believes that:

- Therapy services should be accessible to individuals and families – we participate in network with several insurers
- Clinicians should be reimbursed for time that supports their clinical practice – we offer a professional development stipend and administrative pay
- Clinicians should be able to focus on practicing and growing their areas of interest – so we protect your time by fielding intakes, billing, collections, credentialing, marketing, etc.
- Clinicians should have the support of fellow professionals – our team meets bi-weekly for a case consultation group

A good fit for our team:

- Is trained and experienced in conducting individual therapy with an emphasis placed on utilizing evidence-based practices tailored to the needs of clients to help facilitate growth and resilience
- Collaborates with other community professionals, including school-based mental health professionals and psychiatrists
- Is diligent in maintaining timely and accurate documentation

Position benefits include:

- W2 status with benefits (Medical and Dental Insurance, Professional Development Stipend)
- Malpractice insurance maintained by GPS
- Marketing and networking support and source of regular referrals for cases
- Assistance in getting credentialed and joining insurance panels
- Insurance billing and fee collection
- Electronic health record and telehealth system
- Flexible schedule – opportunity to work in-person and via telehealth
