

Clinical Psychologist or Post-doctoral Fellow

Interested applicants should email a copy of their CV & a de-identified report to info@growthps.com

Growth Psychological Services, PLLC (GPS) is a team of clinicians passionate about helping clients better understand themselves and navigate their lives. Our clinical and school psychologists accomplish this with comprehensive neuropsychological testing with an emphasis on recommendations to foster strengths and support weaknesses. Our team of skilled clinicians is also passionate about integrating diverse therapy modes to help our clients grow and accomplish their goals. Among these we practice CBT, ACT, attachment based, trauma focused, humanistic, & internal family systems.

Demand for testing and therapy services in our area is far outpacing our ability to meet individual and family needs. We don't want to quote a 3-5 month wait time for testing services that would best serve our clients now. We are looking to thoughtfully grow our team with the right clinicians. GPS believes that:

- Testing and therapy services should be accessible to individuals and families – we participate in network with several insurers
- Clinicians should be reimbursed for time that supports their clinical practice – we offer a professional development stipend and administrative pay
- Clinicians should be able to focus on practicing and growing their areas of interest – so we protect your time by fielding intakes, billing, collections, credentialing, marketing, etc.

A good fit for our team:

- Is trained and experienced in providing comprehensive diagnostic evaluations and wants to continually evolve and grow this skillset to continue to best serve clients
- Collaborates with other community professionals, including school-based mental health professionals and psychiatrists
- Is diligent in maintaining timely and accurate documentation

Position benefits include:

- W2 status with benefits (Medical and Dental Insurance, Professional Development Stipend)
- Malpractice insurance maintained by GPS
- Marketing and networking support and source of regular referrals for cases
- Assistance in getting credentialed and joining insurance panels
- Insurance billing and fee collection
- Electronic health record and telehealth system
- Flexible schedule – opportunity to work in-person and via telehealth
